**WHEN YOUR DESTINY IS TO LEAD
THE UNVAXXINATED REBELLION**

What is Catvax?

CATVAX is a community "shitcoin" created to become the greatest meme coin of all time. Its popularity in the meme token universe carries a unique philanthropic mission: to help victims (both cats and humans) of vaccine side effects and to give a voice to those who dare to protest against the established diktat. CATVAX is the token for those who refuse to kneel, for those who stand up and make their voices heard.

CATVAX, symbolized by the image of a weathered cat, is more than just a meme; it's a call for revolution and freedom. It is a community token not owned by developers. It belongs to everyone. Each time someone adds it to a photo and spreads it through the digital jungle, they fuel the CATVAX movement.

WHEN YOUR CAT
REINCARNATES TO SAVE
THE UNIVERSE

2 - CATVAX TOKENOMICS

There are only 66 million CATVAX tokens in existence. The valuation of CATVAX token relies on community engagement and the continuous development of CATVAX movement. In digital marketing, each interaction acts as a value multiplier, amplified by behavioral algorithms. Every photo posted, every repost on Twitter, every like, and every share increases its visibility, impact, and consequently, its valuation. Each CATVAX holder plays an active role in the movement. By promoting sustained digital interaction and cryptographic communication CATVAX holders directly influence the valuation of their project.

3 - WHO IS THE CATVAX ?

The legend takes place in the era of Trianlidia, in the prosperous city of Felinia City, where cats and humans lived in harmony. At the heart of this city, the FelineGenetics laboratory conducted secret experiments.

One day, a thousand genetically modified catfish, called BluBlus, escaped from FelineGenetics. These creatures with supernatural abilities vanished into the city, sparking a frantic search. Antonio White, a stray and unvaccinated cat, accidentally swallowed a BluBlus. Captured by a street vendor, Antonio was turned into soup and served to Cheikh Khita, a heroic doctor who helped humans with the harmful effects of vaccines from FelineGenetics. The consumption of this soup, infused with BluBlus's powers, caused a divine transmutation between the Cheikh and Antonio. This fusion, possible because neither Antonio nor the Cheikh were vaccinated, led to the birth of the CATVAX, the cat with 82 muscles.

The CATVAX was reborn with a divine mission: to protect cats and humans from the negative effects of vaccines and create a global movement against oppression and dictatorship. Endowed with supernatural abilities, he raises awareness and protects those in need. Today, the quest to find the thousand escaped BluBlus continues. The mystery remains whether more BluBlus have been consumed. The CATVAX fights tirelessly for a future where cats and humans live free and healthy. In a world where only whispers were heard, the CATVAX rose, becoming a beacon of hope in the dark horizon of Felinia City, reminding everyone that even in the most desperate times, rebirth and redemption are possible.

4 - CATVAX PROJECT PHASES : EXPANTHRIUM

The first phase, named Trianlidia, marks the genesis of the CATVAX project. During this crucial period, CATVAX token was created and launched, signifying the advent of the Antonio White and Cheikh Kita era. The primary objective of this phase was to introduce and establish the token, transitioning it to a community-owned asset. Initially, 100 million tokens were created, but 34 million were burned to reach the enigmatic total of 66 million tokens. This laid the foundation for future development.

Our current phase, launched on May 18, 2024, is called Expanthrium.

This phase represents a period of expansion and consolidation for CATVAX. The community is actively working on expanding the project's image and developing new products, such as music, 999 Blublus NFTs, comics, and other innovative ideas to broaden the scope of the CATVAX. Expanthrium also aims to consolidate and stabilize the CATVAX token while forging new strategic partnerships. This phase builds on the achievements of Trianlidia and establishes a solid foundation for the future stages of CATVAX.

5 - CATVAX DONATIONS

CATVAX is committed to philanthropy. A dedicated wallet will be available within the community group, allowing members to make donations to cat shelters and victims of vaccine side effects through various associations. These donations will be carefully documented and presented in advance with specific goals and objectives. This transparency ensures that every contribution is used effectively and with clear intent.

How It Works:

1. **Dedicated Wallet:** A secure wallet has been set up and shared with the community for collecting donations.
2. **Targeted Donations:** Donations will be allocated to cat shelters and organizations supporting victims of COVID 19 vaccine side effects.
3. **Transparency and Accountability:** Every donation will be documented, and the goals for each donation drive will be clearly presented to the community. Regular updates will be provided to show the impact of contributions.
4. **Community Involvement:** The CATVAX community will be actively involved in choosing the recipients of donations and monitoring the progress towards goals.

By incorporating this philanthropic aspect, CATVAX demonstrates its commitment to making a positive impact on both animal welfare and human health. This mission strengthens the community's resolve and reinforces the purpose behind the CATVAX movement.

WHEN THE PROPHECY SAYS
YOU'RE THE UNVACCINATED HERO.

6- CATVAX IN THE MEME3 CULTURE

CATVAX embodies MEME3 culture, where humor, mystery, creativity, and community engagement are central. MEME3 evolves traditional memes by incorporating decentralization, blockchain, and community involvement. Here's how CATVAX fits in:

Humor and Storytelling:

CATVAX uses fantasy and humor to captivate the community through engaging stories and digital content.

Decentralization and Community Ownership:

CATVAX is community-owned, allowing holders to influence the project's direction and fostering a sense of belonging.

Content Creation and Sharing:

Holders are encouraged to create and share digital content, enhancing CATVAX's visibility and value.

Gamification and Engagement:

Future game mechanics will allow NFT holders to participate in challenges, earning rewards and tokens.

Innovation and Experimentation:

CATVAX explores new ideas, staying innovative with derivative products, music, and NFTs.

Influence and Collaboration:

Collaborations with influencers brand content creators amplify CATVAX's message and expand its reach. By embracing MEME3 principles, CATVAX builds a dynamic movement, establishing itself as a key player in the evolving digital landscape.
